EDUCATION

Northeastern University

Boston, MA

Honors Candidate for Bachelor of Science in Computer Science, Minor in Mathematics *Graduation: December 2027*

Awards: Dean's List (F24, SP25, F25, SP26)

GPA: 4.0 / 4.0

Relevant Coursework: Theory of Computation, Programming Languages, Algorithms and Data Structures, Computer Systems, Object Oriented Design, Cloud Computing, Discrete Mathematics, Linear Algebra

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, Ruby, HTML, CSS, C++, C#, C, Racket

Frameworks & Libraries: React.js, Rails, Vue.js, Next.js, Spring Boot, Tailwind, Express.js, Node.js, tRPC, Prisma

Tools & Platforms: Git, Docker, AWS, PostgreSQL, Vercel, GitHub Pages, n8n, JUnit, VS Code, IntelliJ, Claude Code

Certifications: AWS Cloud Practitioner

Interests: Skiing, Biking, Basketball, Tennis, Cooking, Rock Climbing, Eagle Scout

WORK EXPERIENCE

Software Engineering Intern

Jun. 2026 – Present

Acorns

Remote

- Developing features for the Acorns Android application as a Software Engineering Intern on the Growth Team

Software Engineering Co-op

Jan. 2026 – Jun. 2026

Smartleaf

Boston, MA

- Engineered backend API functionality in Ruby on Rails and PostgreSQL to enable an enterprise client to integrate with Smartleaf's automated household portfolio optimization features, serving 2,500+ households in production
- Expanded Smartleaf's household optimization system with configurable daily job scheduling, building new job infrastructure and extending existing logic tailored to client needs, accumulating 1,300+ calls within 6 months
- Led a team of 3 engineers to migrate the full API documentation suite from static specs to a dynamic Markdown and YAML frontmatter format, enabling CI/CD integrated publishing to both internal and external audiences

Technical Director

Aug. 2026 – Present

Sandbox at Northeastern

Boston, MA

- Oversee the technical execution and delivery of 8 concurrent client-facing software projects, mentoring project leads to drive engineering decisions, project planning, team operations, and successful outcomes across the organization
- Lead weekly project leadership meetings to coordinate project strategy, resolve technical and organizational challenges, sync on the progress of project goals, and align project leads on the overall priorities of the organization
- Serve as the primary liaison between Sandbox leadership, university stakeholders, and external clients, facilitating project scoping, resource allocation, and cross-functional collaboration to support successful project delivery

Resident Assistant

Aug. 2025 – Present

Residential Life, Northeastern University

Boston, MA

- Foster a safe, inclusive community for 30+ residents, organizing programs that promote engagement and well-being
- Guide residents through academic resources, professional development, and campus involvement opportunities

PROJECT EXPERIENCE

Good Dog Licensing | *React.js, TypeScript, Tailwind, Next.js, tRPC, Prisma*

Jan. 2025 – Apr. 2026

- Led the team to develop solutions for our client's challenges while supporting each other's growth
- Develop responsive frontend components and pages that seamlessly integrate with backend services, providing forms for users to submit music and media, and giving admins dynamic dashboards to efficiently match content
- Build and iterate on the music submission and matching backend tRPC workflows as the client's needs change

Clue Sidekick | *Vue.js, TypeScript, Tailwind, Java, Spring Boot, Vercel, AWS*

May. 2025 – Jul. 2025

- Designed an intuitive Vue.js interface compatible with any variation of Clue, featuring chat-style interactions that guide players, track guesses, and generate an automated, color-coded scorecard that makes deductions for them
- Developed an automated deduction engine in Java Spring Boot that tracks hidden information across multiple players and pinpoints solutions using process of elimination
